OSADA ENAC Model : OE-F15

PIEZOELECTRIC ULTRASONIC OSCILLATING SYSTEM

**Specifically Designed With Extra High Cutting Power
For Oral Surgery Procedures**

The automatically tuned OE-F15 provides energetic cutting power beyond OE-W10, yet still yields Osada's signature - fine, precise cutting results.

The ergonomically designed SE15 handpiece stays cool and illuminates the surgical area. The simultaneous irrigation (with peristaltic pump) minimizes temperature increase on the attachment tips and the surgical sites.

**SE15 LED Handpiece
& ST106**

**ENAC OE-F15 / SE15 set
assembled**
